- Visual Studio Code (VS Code)

Education

Bachelor of Technology in
Computer Science
SVCE , Tirupati
2020–2024

Board of Intermediate
Sri Chaitanya Junior College
2018–2020

Secondary School Certificate
Ravindra Bharathi School
2017–2018

Internshps

Website Developer
Virtual Internship at 1Stop
01st Oct, 2022 – 30th Nov, 2022

MongoDB with Django
Virtual Internship at Verzeo
01st May, 2022 – 30th June, 2022

Projects

Forkify Application
- Developed a recipe search and management tool that fetches recipe data via API, allowing users to search, scale ingredients, and save favorite recipes.

Stock Target Price Analysis
- Designed a tool that calculates potential profits and losses for stock trades based on user inputs like lot size, stop loss, and risk-to-reward ratio.

Product detail page
- Developed a product detail page for an e-commerce site, allowing users to view product information, images, pricing, and reviews. Integrated "Add to Cart" functionality.

E-Commerce Commerce website
- Built a complete e-commerce platform with features like product search, user registration, shopping cart, secure checkout, and admin management for orders and inventory.

Guess the Number Game
- Created an interactive game where users guess a randomly generated number within a range, receiving feedback on whether their guess is too high or low.
